Lee Austin

INFRASTRUCTURE SUPPORT | LINUX SUPPORT | SYSTEMS ADMINISTRATION | CLOUD OPERATIONS
JUNIOR DEVOPS | IT SUPPORT

Blaine, MN | lee.austin.lab@gmail.com | github.com/Capasiter | linkedin.com/in/leeaustinmn

PROFESSIONAL SUMMARY

Hands-on infrastructure and technical support professional with experience in computer repair, field service, manufacturing operations, and a documented Linux and Kubernetes homelab. Builds and operates repeatable infrastructure with Proxmox, OpenTofu, Ansible, K3s, GitOps, monitoring, and backups. Brings systematic troubleshooting, hardware diagnosis, customer communication, and clear technical documentation to infrastructure support, Linux support, systems administration, cloud operations, junior DevOps, and IT support roles.

TECHNICAL SKILLS

Infrastructure and virtualization: Proxmox VE, Unraid, virtual machines, LXC containers, physical server assembly, hardware diagnostics, storage replacement, Ethernet cabling, and cable management

Linux and automation: Ubuntu, Debian, Windows 11, Bash, SSH, OpenTofu, Ansible, cloud-init, Git, GitHub Actions, YAML

Kubernetes and operations: K3s, Kubernetes, embedded etcd, kube-vip, Argo CD, GitOps, Prometheus, Grafana, off-server etcd backups, CI validation

Networking and endpoint support: TCP/IP, DNS, OPNsense, isolated virtual networks, routing, NAT, desktop and laptop repair, operating system and software installation, malware removal, and peripherals

INFRASTRUCTURE PORTFOLIO

Homelab Infrastructure Portfolio | Personal lab project | 2021 - Present

Project: github.com/Capasiter/homelab-portfolio

- Developed foundational homelab skills with Unraid virtual machines, Docker containers, and shared network folders for household use before expanding into the current infrastructure portfolio.
- Provisioned and documented isolated Proxmox infrastructure using reusable OpenTofu modules, cloud-init Ubuntu virtual machines, and idempotent Ansible configuration management.
- Built and operated a three-node K3s Kubernetes control plane with embedded etcd and a kube-vip virtual IP for a stable API endpoint.
- Implemented Prometheus and Grafana monitoring, validated off-server etcd backups, and maintained clear recovery and validation evidence.
- Used Argo CD GitOps to detect configuration drift and manually reconcile workloads to a verified healthy cluster state.
- Maintained GitHub Actions CI validation for infrastructure configuration and published architecture diagrams, runbooks, release notes, and documented limitations through v0.9.0.

PROFESSIONAL EXPERIENCE

E&T Plastics | Material Cutter / Machine Operator

Jun 2025 - Present

- Operate cutting and CNC equipment; read work orders, measure and inspect plastic materials, and prepare accurate customer orders for fulfillment.
- Support inventory, shipping and receiving, forklift work, preventive inspections, and first-line troubleshooting of production machinery.

Fogerty Arena | Curling Ice Maintenance Assistant (Part-Time)

Jun 2026 - Present

- Maintain six curling sheets through precise, repeatable surface-preparation procedures for scheduled leagues and events.
- Inspect equipment and playing surfaces, identify developing issues, make appropriate adjustments, and coordinate time-sensitive work to prevent delays.

Zerorez | Service Technician

2018-2019; 2022-2025

- Delivered in-home carpet, air-duct, upholstery, tile, and area-rug services while explaining work clearly and protecting customer property.
- Diagnosed equipment and service issues in the field, documented completed work, adapted to changing conditions, and resolved customer concerns professionally.

K Mfg | Manufacturing Operator

2016-2018; 2019-2022

- Operated machining and production equipment to work instructions, blueprints, and quality requirements using precision measurement and inspection practices.
- Performed routine maintenance, identified equipment and process issues, and supported consistent production in a safety-focused environment.

General Nanosystems | Laptop Manager / Computer Repair

2008 - 2013

- Performed paid desktop and laptop repair and upgrades, including DC jacks, displays, keyboards, motherboards, storage, operating systems, and software.
- Diagnosed hardware, software, malware, and basic home-network issues; selected compatible components and explained repair options in practical language.

EDUCATION

ITT Technical Institute | Networking and Telecommunications Coursework | GPA 3.9 | 2007 - 2009
